Dear Dr Paul Van Dun,

With this letter I would like to cordially thank you for visiting the University of Patras on January 11th, 2013. I hope my colleagues managed to give you an overview of the Technology Transfer Procedures followed by our ITTO, and also to present you with some of our research laboratories, as well as, the research and development environment in the area.

Your suggestions on improving our procedures and the personnel skills in Technology Transfer are of vital importance to our University, especially during this period of economic crisis.

Sincerely yours,

Prof. George Panayiotakis
Rector
